Meeting notes — Rooms With a View

Date: Tuesday 12 May 2026, 2:00–3:15pm **Where:** Zoom + 4th-floor seminar room
Present: Lena Marchetti, Tomás Ferreira, Hana Oduya **Absent:** Miriam Halloran (advisor; traveling)
Notes: Tomás

---

1. Intro draft v1 (Lena)

- General enthusiasm about the framing ("where you sleep shapes whom you know"). Hana: the numbers in the intro are from the April quick run, which was not the final sample. The intro should be updated once the full run is done.
- Tomás: the lit is thin and a couple of citations need checking (Michelman et al.). He'll do proper lit notes.
- Policy paragraph: keep it for now, revisit later.

2. Definitions

- Long discussion of what "high-SES" means. Options: (a) not Pell-eligible, (b) top national quintile of parental AGI, (c) above-median national income, as in Chetty et al. (2022).
- **Decision:** use (b), top national quintile, as the main definition. It is closest to how the Chetty college paper talks about income groups, and it gives a clean "affluent" group. Robustness with (c) later.
- Low-SES = Pell-eligible in first year. Everyone agreed.

3. Outcomes

- **Decision:** 12 outcomes, 6 academic + 6 early-career (Tomás to write them down in the data appendix).
- **Decision:** headline is Year-1 EC. Earnings are secondary until the consent sample is built.
- Hana raised the question of *when* UI consent is collected. Nobody was sure. It matters for whether earnings are pre- or post-treatment.

4. Timeline

- Brown bag at the Applied Micro Lunch: **Wednesday 15 July**. Full draft to Miriam by 31 August.
